

There are Little Soldiers in Your Blood

They are the white corpuscles, and there are millions of them.

It is their duty to defend you against disease, by protecting the red corpuscles and the bodily tissues from disease germs—those dangerous micro-organisms of which so much is now known.

You are helpless unless these little soldiers in your blood have the health and strength to fight for you—to repel the many infectious and contagious diseases whose germs are in the air you breathe, the water you drink, the food you eat, and on things you touch.

Among these diseases are typhoid fever, scarlet fever, diphtheria, grip, spotted fever, smallpox, malaria, ague, tuberculosis or consumption.

To make and keep these little soldiers healthy and strong, is simply to make and keep the blood of the right quality and quantity.

This is just what Hood's Sarsaparilla does. It is the best preventive as well as curative medicine. If your blood is impure and impoverished, a condition indicated by eruptions, scrofula, eczema, catarrh, rheumatism, anemia, nervousness, tired, languid feelings, loss of appetite, general debility, then the soldiers in your blood are not in condition to fight for you. They need better health and greater strength. You should begin taking Hood's Sarsaparilla at once.

Hood's Sarsaparilla effects its wonderful cures, not simply because it contains sarsaparilla, but because it combines the utmost remedial values of more than 30 different ingredients, each greatly strengthened and enriched by this peculiar combination. These ingredients are the very remedies that successful physicians prescribe for the same diseases and ailments. There is no real substitute for Hood's Sarsaparilla. It urged to buy any preparation said to be "just as good," you may be sure it is inferior, costs less to make, and yields the dealer a larger profit.

Begin taking Hood's Sarsaparilla today. Get it in the usual liquid form or in chocolate tablets known as Sarsastabs. 100 Doses One Dollar.

FOR A FEDERAL CHILDREN'S BUREAU.

To Investigate Infant Mortality, the Birth Rate, Physical Degeneracy, Orphanage, Juvenile Delinquency and Juvenile Courts, Desertion, and Illegitimacy, Employment, Dangerous Occupations, Accidents and Diseases of Children of the Industrial Classes, Legislation Affecting Children in the Several States and Territories.

EDWARD T. DEVINE

General Secretary New York Charity Organization Society.

(Exclusive Service Charities and The Commons Press Bureau.)

(A bill to establish the Federal Children's Bureau, introduced in Congress by Herbert Parsons of New York, known as H. R. Bill 2448, and has been referred to the committee on Expenditures and the committee on Education, and the committee on Education, Mr. Devine's discussion of the necessity for the bureau is made particularly timely by the interest aroused in this new bill.)

The facts concerning the chaotic and even yet, on the whole backward condition of the legislation on the subject of children in our several States, speak very eloquently of the need for further public enlightenment. The existing Bureau of Labor, Census Bureau, Bureau of Public Health and Marine Hospital Service, and Bureau of Education, all have certain limited and fragmentary responsibilities for the welfare of the nation's children.

Even these responsibilities, however, might be discharged far more completely if they were concentrated. The labor of children enters into the relations between employer and employee, and into the general question of the condition of labor with which the Federal Bureau of Labor deals, but this very fact is anomalous and deplorable. There should be no such thing as child labor, and while it exists it should have the serious attention of the government, not as a normal condition to be investigated and regulated like adult labor in industry, but as an abnormal and temporary condition to be eliminated as speedily as possible. It should be investigated and dealt with as a social and economic problem, but as one affecting the very life and well being of the race, as a problem of health, education, morals and social economy.

With all recognition of the usefulness of such partial and sporadic attention as the Labor Bureau has been able to give the subject, it is obvious that the interests of children are literally vital, national concern and that they should be approached from quite another point of view than that from which strikes, wages and the conditions of adult labor are appropriately treated. Nor does the Census Bureau serve the purpose which a bureau of children would serve. The collection of certain very limited, statistical information at stated periods is of value. Unfortunately we have not much of it, and what we have is out of date when it appears. Slow and antiquated methods of making available the results of investigations in the Census Bureau in this field go far to destroy what value they might otherwise have, and the scope of such inquiries as have been made is so narrow as to leave us in helpless and humiliating ignorance. Quantitative investigations, however, by the Census Bureau, and we need a children's bureau to determine what information is desirable and to consider what to do after it has been obtained.

The rudimentary Bureau of Public Health in the Treasury Department commands constantly increasing respect for its work in controlling epidemics and its scientific inquiries in various directions, notably, for example, in its current investigation of the hook worm. If this bureau should eventually outgrow the limitations imposed by its origin in the Marine Hospital Service, and should become in reality a bureau of public health, it

would naturally include within its activities the investigation of many problems connected with epidemic and infectious diseases of children and other dangers to their health.

But a children's bureau would seek to promote the health, vigor, physical well being and efficiency of children, and would thus begin where a health bureau ends. It would utilize the results of all investigations by Labor Bureau, Census Bureau and Health Bureau, so far as they bear upon the welfare of children. It would directly concern itself with the improvement of the human material by the improvement of its physical and mental stock. Even the Bureau of Education, however active and efficient in many respects, cannot cover the wide range of activities which would naturally devolve upon the children's bureau. Orphanage, illegitimacy, infant mortality, race suicide and race degeneracy, child dependency, juvenile delinquency with all its attendant issues of children's courts, reformatory, probation and parental schools, and the more complete socialization of the public school system, with the broad issues which involve among the problems which we now neglect entirely, or in part, but which are of national importance, and which in the degree and manner proposed are clearly within the constitutional province of the Federal Government.

It is not suggested that the national government should take up all or perhaps any of these subjects for direct remedial or preventive legislation. Remedial and preventive legislation is analogous to the well established activities of many existing bureaus is the aim of those who advocate the children's bureau.

It is suggested that the national government should take up all or perhaps any of these subjects for direct remedial or preventive legislation.

FOR 23RD TIME CLAN CAMPBELL HONORS BURNS

INTERESTING PROGRAM IN EAGLES' HALL—GRAND MARCH LED BY CHIEF CLANSMAN DONALD NICHOLSON AND WIFE.

Yesterday was the 150th anniversary of the birth of the Scottish poet, Robert Burns, and was celebrated most becomingly by Clan Campbell, Order of the Scottish Clans, at Eagles' Hall, last evening, before a large audience for the 23rd time. Beginning at eight o'clock, a splendid concert was given, which lasted a little over two hours.

The concert was opened with a march. The members of Clan Campbell, wearing their plaids and caps marched around the hall, led by Captain Piper John Robertson. Miss A. Dorothy Munz of New Haven, in a very clear and sweet voice, sang "Annie Laurie." She was accompanied by Mr. George Fulton, in a soft tenor, "The Star o' Bobbie Burns," and "O' the Airts" and as an encore sang "He's a Bonnie Lad."

The Koppie Sisters, the Misses Eva, Bella and Vina, wearing the cherished "kitties" were seen in a number of character dances. In the first part of the program, the members of the Highland Fling and the Sword dance and in the second part, the Sallor's hornpipe, the Irish jig and Irish Reel. The three sisters took the audience by storm.

Mrs. A. C. Mertens sang "My Heather-land Home" and "A Bunch of Blue Heather." As an encore she gave "For Johnnie My Darling." Mr. Joseph Weiler of the South Congregational Church choir made a hit with "The March of the Cameron Men," and "The MacGregors' Gathering."

The blood of the Scottish audience was sent coursing swiftly through its veins when John Robertson, the clan piper, opened the second part of the program with a well played and spirited bag pipe. He was followed again and again, in fact all who took part in the programme were encouraged at least once and some several times.

The hit of the evening came in the humorous selections of Eddie Madigan, impersonating the great Scotch comedian Harry Lauder. Mr. Madigan sang "Robert Burns," a most appropriate monologue and followed it with "I Love a Lassie." In the second part of the programme Mr. Madigan rendered "When I Go Back Again to Bonnie Scotland," following it with a Scotch monologue and followed it with "I Love a Lassie."

The grand march was led by Chief Clansman and Mrs. Donald Nicholson, with about 55 couples. The decorations in the hall were very appropriate. A large picture of Burns, was shown while on the one side, of it was a large American flag and on the other the royal standard of Scotland. The evening was a complete success. The managers were: Floor manager, Alexander McKennie; assistant floor manager, James McKennie; aides, Alex. C. Hogg, R. D. Hogg, Wm. Duffie, William Cobb, William McKennie, Robert Brown; reception committee, John Japp, chairman; Frank Finkle, Dan John, John Dalling, Thomas Stewart, Wm. Duffie; amusement committee, Wm. G. Simpson, chairman; Alex. C. Hogg, secretary; D. Nicholson; treasurer, Alex. McKennie; Alex. McKennie; Wm. Finkle, Wm. Martin, James Rae.

PERSIAN PRINCE IN WASHINGTON

(Special from United Press.)

Washington, Jan. 30.—Persian Prince is in town with his identity concealed under an American hat and inside of American store clothes. When he is at home he is known as Prince Kalvatz, and is the son of the late Shah of Persia. He is the great grandson of Fatahi Shah, who held down the Persian throne some years back, and is the grand nephew of Mohammed Ali Merhe.

Prince Kalvatz is stopping at the Persian Consul with Ali Kuli Khan and is here to study American ideas.

ATLANTA THEATRE BURNED.

Atlanta, Ga., Jan. 30.—Shortly before dawn this morning a fire destroyed the Lyceum theatre, an old landmark, a sixty mile an hour wind was blowing, and a number of firemen narrowly escaped death under falling walls. Several were frozen to the ladders on which they were working.

Charcoal Purifies Any Breath

And in its Purest Form Has Long Been Known As the Greatest Gas Absorber.

Pure willow charcoal will oxidize almost any odor and render it sweet and absorb deadly fumes, for charcoal absorbs one hundred times its volume in gas.

The ancients knew the value of charcoal and administered it in cases of illness, especially pertaining to the stomach. In England today charcoal poultices are used for the same purpose, while some physicians in Europe claim to cure many skin diseases by covering the afflicted skin with charcoal powder.

Stuart's Charcoal Lozenges go into the mouth and transfer foul odors at once into oxygen, absorb noxious gases and acids and when swallowed mix with the digestive juices and stop gas making, fermentation and decay.

By their gentle qualities they control beneficially bowel action and stop diarrhoea and prevent the spread of cholera. Bad breath simply cannot exist when charcoal is used. There are no ifs or ands about this statement. Don't take our word for it, but look into the matter. Ask your druggist or physician, or better still, look up charcoal in your encyclopedia. The beauty of Stuart's Charcoal Lozenges is that the highest pharmaceutical expert knowledge obtainable has been used to prepare a lozenge that will give to man the best form of charcoal for use.

Pure willow and honey is the result. Two or three after meals and at bedtime sweeten the breath, stop decay of teeth, aid the digestive apparatus and promote perfect bowel action. They enrich the supply of oxygen to the system and thereby revivify the blood and nerves.

Stuart's Charcoal Lozenges are sold everywhere in vast quantities, thus they must have merit. Every druggist carries them, price, twenty-five cents per box of six, send your name and address and we will send you a trial package by mail free. Address: F. A. Stuart Co., 200 Stuart Bldg., Marshall, Mich.

VICE CONSUL WAS ALMOST DESTITUTE NEW CLASSES FOR AMBITIOUS MALES

Second Letter from American Representative at Messina.

Washington, Jan. 30.—"When the earthquake came I had \$4 in my pocket, had lost the greater part of my effects, spoke very little Italian and every person I knew in the city was dead. I have not had a bath for two weeks and did not get my clothes off for ten days after the earthquake." Thus writes Stuart K. Lupton, American Vice-Consul in charge at Messina, whose thrilling experience in the earthquake was told exclusively in the United Press dispatches of January 22. A second letter to-day from Lupton tells what followed in the wake of the disaster as well as of his own troubles. "There is a mob of Lazzaroni in front of the consulate at present," he writes, "nearly all of them carrying bundles of food obtained from relief crews. I have to go down and still the tumult, taking a rifle from a sentry who seemed to be pushing the people back with it and then closing the doors to keep the building from being carried off piecemeal.

"I cannot say that my present existence in Sicily is enviable. Shocks still continue at short intervals, there having been seven last night and six this morning. I do not wish the department to do anything further at present."

LODGE ROOM NOTES

Bridgeport lodge, B. P. O. E., balloted on 18 candidates for membership, and those elected to membership will be initiated at the meeting Friday night of next week, after which a social session will be held. The new by-laws of the lodge were adopted.

One application was received at the meeting of Archaean lodge, I. O. O. F., following the meeting a luncheon was served. It is expected that by next meeting something definite will be known in regard to the plans of the four local lodges of I. O. O. F. for new quarters.

Lessing lodge, I. O. O. F., worked the third degree on three candidates and held a social session after the meeting.

At the annual meeting of the Employees' Mutual Benefit association of the Challenge Cutlery Corporation held at Pioneer Hall the following officers were elected for the ensuing year: President, George Hattersley; vice-president, William Rundle; secretary, Will. A. Kent; treasurer, George Kloefkorn; auditing committee for one year, Lawrence F. Keenan, Frank Braithwaite and Ernest Kalmer, Henry Food, the retiring president, who has held the office for the past three years was given a rising vote of thanks. Clemens Kloefkorn, who has been treasurer of the association since its organization, was unanimously chosen for another year. It was also voted to hold the annual meeting in January and the semi-annual meeting in July.

INSTALLATION OF REV. MR. WEIMER TOMORROW EVENING

The official installation of Rev. Herman G. Wiemer, as the permanent pastor of the German Reformed church, tomorrow, will bring a number of the prominent citizens of the city to New York Classis to this city to take part in the ceremony.

The visiting clergymen will be Rev. William T. Barney of Mowen, N. J.; Rev. George A. Goddard, of the Great Orphan Asylum of Brooklyn; and Rev. Paul H. Land, the harbor missionary at Ellis Island. Rev. Henry A. Davison, pastor of the People's Reformed church, who was a close friend of Rev. Casper Brunner, deceased, former pastor and founder of the church in this city, will also take part in the installation. A special musical program has been prepared for the ceremony.

Rev. George Goddard will preach at the services tomorrow morning at 10:30.

BELL PEAL FOR BERNHARDS

Superintendent of Reformed Church Sunday School Honored by Congregation.

William and Pauline Bernhard of 719 Franklin avenue, unexpectedly celebrated their 25th wedding anniversary last night at the German Reformed church. The church societies were present and the pastor, Rev. H. G. Wiemer. The affair was a complete surprise to Mr. and Mrs. Bernhard. They were invited by Mr. and Mrs. Wiemer to the church for the evening, with them at the parsonage. They were chatting with their hosts, when Leo Schmidt requested them to enter the church, where the church societies were gathered for the Sunday school room filled with the members of the congregation. Mr. Wiemer made a congratulatory address. The church bell was pealed.

Wiemer played the wedding march from Lohengrin, after which Mr. Wiemer, for the congregation, presented the couple with a solid silver tea set of six pieces.

The company was entertained by Prof. Ferdinand Fotch and two of his most promising pupils, Lillian Levering on the piano, and Lydia Meyer on the violin. Mr. and Mrs. Bernhard were married in 1884 by the late Casper Brunner and have had three children born to them, two of whom are now living, they being Sophia A. Frederick and William, Jr. Mr. Bernhard is one of the leading members of the church, besides being superintendent of the Sunday school.

To be added to Mechanical Courses at Y. M. C. A. Institute.

One Group for Men and the Other for Boys—Course to Comprise 40 Lessons.

There has been so much demand for the new mechanical courses at the Y. M. C. A. Institute that two new classes are to be started next week to go on for 20 weeks and cover 40 lessons.

The school work of the association was thoroughly reorganized last fall and a new mechanical course, modeled after that given by the General Electric Co., at Lynn, was established and met with such favor that no less than 100 different students have been enrolled in this course alone.

A unique feature of the school and one that has met with the especial approval and co-operation of the manufacturers of the city was the establishment of day mechanical courses. These boys come for two hours a day for three days each week, on company time and at company expense. They are divided into four graded groups and take up shop mathematics and calculations, machine sketching and mechanical drawing.

This work is under the personal direction of John Brodhead, M. E., a graduate of Lehigh University and lately with the Bethlehem Steel Co., who gave up his position there to take up this work. In addition to the day work, Mr. Brodhead, who devotes his whole time to the school, teaches two of the evening groups, of which there are now four in the mechanical course. The new groups to be started next week will be limited to fifteen students each and one will be for boys and the other for men. Those who wish to enroll will need to attend to the matter promptly.

A special course for machinists in laying out work and shop calculations will also be started if enough men apply.

Next week the first of a series of weekly practical talks will be given on Tuesday at 8:15, by John Brodhead on the subject "From Iron Ore to High Grade Steel." Other interesting topics will be presented on successive Tuesday evenings by men of large practical experience on the general topic of "The Mechanical Industries of the City." These talks will be free to men who wish to attend although students in the school.

SUNLIGHT IS ENEMY OF CONSUMPTION

No Medicine That Comes Out of a Bottle Will Cure The Disease—Address by Dr. Day.

"Sunlight and fresh air are the greatest enemies of the tubercular germ outside of the human body. The sputum of the consumptive is the greatest agency of transmission. The old belief of inheriting disease has been disproved and even the transmission of the tendency of disease is doubted. Persons engaged in the occupations of stone cutting, grinding, polishing, weaving and the like are predisposed to the disease. Dr. Fessenden F. Day in a talk upon tuberculosis before the Young Men's Club of the West End Congregational church last night.

As proof that sunlight and fresh air are preventives of the disease he said that tuberculosis was rarely found in animals and birds who roam wild. "As far back as 500 years, B. E." he said, "pulmonary tuberculosis was known to be a disease of the human race. It remained for Robert Koch, a health officer in an obscure German village to discover the germ, which is one-thousandth of an inch in size."

The speaker stated that tuberculosis is preventable, curable, and is also communicable. A healthy person may contract tuberculosis in three ways, by inhalation, by swallowing food containing the germs, or through an open wound. Inoculation by the latter means is very rare.

The doctor said that no medicine that ever came out of a bottle would cure the disease. Although there had been no arrests for spitting on the sidewalks, the doctor said he thought the signs placed about the city by the board of health had done good because they drew attention to the city ordinance forbidding expectoration.

There was a large attendance despite the inclemency of the weather.

FIGHT AGAINST CHILD LABOR BILL

(Special from United Press.)

SMITH, MURRAY & CO. VALENTINES

We are headquarters for these goods this year. This morning we put on sale a full line of the Geo. C. Whitney's Valentines in a great variety of designs starting at 1c and up to 89c each. These goods are bewildering in their beauty and design. The assortment consists of hand painted celluloid novelty Valentines, each one in a box Valentine Hearts, Cards, Etc., Etc.

Printers' ink does not give you any idea of the beauty and colorings. You will have to see them to appreciate them. (Right Aisle, Rear.)
